COUNTY POPULATION REACHES 8,676,000

The population of Los Angeles County increased by 68,100 in the second half of 1989, to reach a total of 8,676,400 on January 1, 1990. This six month gain brings the total increase for the year to 124,800 persons, which represents a moderation of the trend of the preceding two years, which witnessed annual increases of 198,574 for 1987, and 144,200 during 1988. The total increase for the County since the 1980 Census now stands at 1,199,000 persons, an increase of 16%.

Among cities, Los Angeles City led in growth, increasing by 45,300 in the six month period, capturing 66.5% of the county's total gain. This spurt in growth is largely attributable to significant increases in the number of housing units, combined with declining vacancy rates throughout the city. Within the city, Hollywood alone increased in population by 8,300, followed by Westlake with 6,280, Wilshire Center with 4,173, Highland Park with 2,907, and Canoga Park with 2,661.

In addition to Los Angeles, other cities registering significant gains include Palmdale with 5,066, Lancaster 2,589, Glendale 1,911, Whittier with 1,635, Santa Clarita 1,385 and Burbank with 1,280.

North Los Angeles County, comprising the Antelope and Santa Clarita valleys, gained 13,400 people, or just under 20% of the county's total growth for the six month period. This gain represents a modest slowing of the area's growth rates, which have been among the highest for the past decade, from the 15,000 and 21,300 of the preceding two six month periods. These two sub-regions were the fastest growing during the past ten years, with each area more than doubling their 1980 populations.

HOUSING INCREASES BY 342,000 UNITS DURING DECADE

Housing supply increased by 24,148 units in the second half of 1989, thus continuing the current trend of moderate but steady housing growth. This brings the total housing gain for all of 1989 to 44,271 units, which represents a 7.6% decline from 1988, and a 44.6% decline from the record figures of 1987. With these latest additions, the total number of housing units in Los Angeles County now stand at 3,195,578, a net gain of 342,148 or 12% since the 1980 Census.

Multiple units continue to dominate new unit construction with a 65% market share for all of 1989. However, this share is down from the 72% for 1988, a rate that prevailed throughout the decade. This result is attributable to a 32.5% increase in the number of new single units completed, over the prior six month period. North Los Angeles County, where single units constitute 88% of all new residential building, is responsible for 57% of the total county additions for new single units.

The City of Los Angeles continues as the county wide leader in new construction with a gain of 9,929 units, 94.1% of which were in multiple unit construction. Leading areas within the city are Hollywood with 1,550 units added, Canoga Park with 935, and Westchester with 692. Second among cities is Palmdale with a gain of 2,356 units, 97% of which are in single family construction. Other cities posting significant gains are Lancaster with 1,186, Santa Clarita 740, Long Beach 605, Burbank and Diamond Bar with 527 and 475 units respectively. The leaders among unincorporated places are Calabasas with 776 units and Castaic with 494 units.

Major Statistical Areas

Since their creation in the late 1930s, the 35 Major Statistical Areas (MSAs) have served as a unique bench mark for comparing population and housing changes within the same geographic areas of the county. The above Table records the remarkable transformation of the county, the rapid expansion of the population to outlying suburbs, and the period of most pronounced growth within each MSA. With the addition of nearly six million residents during the past fifty years, Los Angeles County has emerged from the status of a pre-War provincial population center, best known for its movie production, to become a leader among Pacific Rim world cities.
